

Horizons In Learning

Workshop Description

Transformative Communication: The Language of Leaders

Course Instructor: Constant Hine

Language is the tool of leaders. In this workshop we will explore the transformative power of language and how communication is more than a set of skills. This workshop links the importance of having an attitude of inquiry, finding the commitment and strength in others with practicing good communication skills.

This workshop is designed to support adult educators, administrators, supervisors, managers, and teachers to be agents of change by learning practical strategies to listen deeply, to speak with heart, to ask meaningful questions that promote reflection and understanding, and to support others to maximize their performance.
